Our Al Platform

Add speed & scale to your investments and client engagement with Analytical and Generative Al

About The Research

Purpose Of The Research:

Al is widely seen as transformational, yet most firms remain stuck in **pilot projects**.

Fragmented initiatives, lack of governance, and risk concerns are slowing down adoption.

This paper provides a **practical framework** to move from experimentation to enterprise-wide transformation.

Key Insights:

70% of CEOs believe they must invest in AI now to stay competitive.

Top 5 Al use cases for impact in next 6–12 months:

- Mass personalization
- Market analysis & economic forecasts
- Automation of back-office processes
- Knowledge management
- Report automation

Opportunities Of Al

Firms use Al to improve quality, performance and marginality

The Al opportunity

Making Sense of Complexity

Today, the challenge is not so much about gathering data but rather it is about interpreting and extracting value from it

Customization at scale

Al can process millions of data points in seconds and build thousands of custom portfolios simultaneously

Automating reporting

Generative and Analytical AI can produce human-like commentaries with deep data analytics capabilities

Higher margins + faster growth

Investment firms that integrate AI overperform peers by +8.1% in AuM growth and +7.7% in revenue growth

Understanding The Technology

What It Does:

Solves complex & time-varying analytical problems

Use Cases:

- Portfolio Optimisation
- Regime Analysis
- Factor Modelling
- Risk Management

Examples:

DataRobot

Qlik

arabesque

clarifai 👺

Generative Al Retrieve, assemble, generate

What It Does:

Generate new content from a text or unstructured input

Use Cases:

- Question answering
- Information retrieval
- Text generation
- Summarization

Examples:

(S) ChatGPT

Midjourney

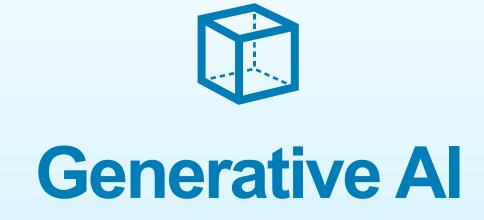

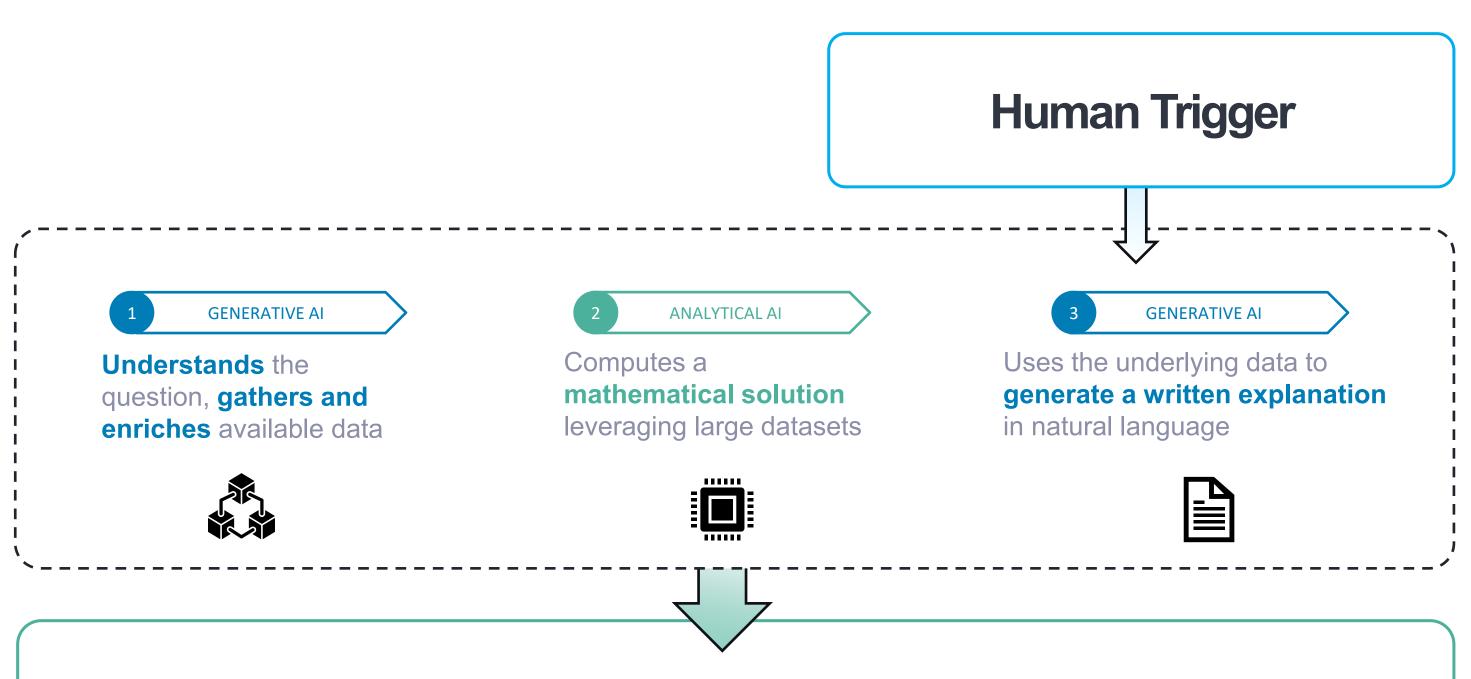

Google Al

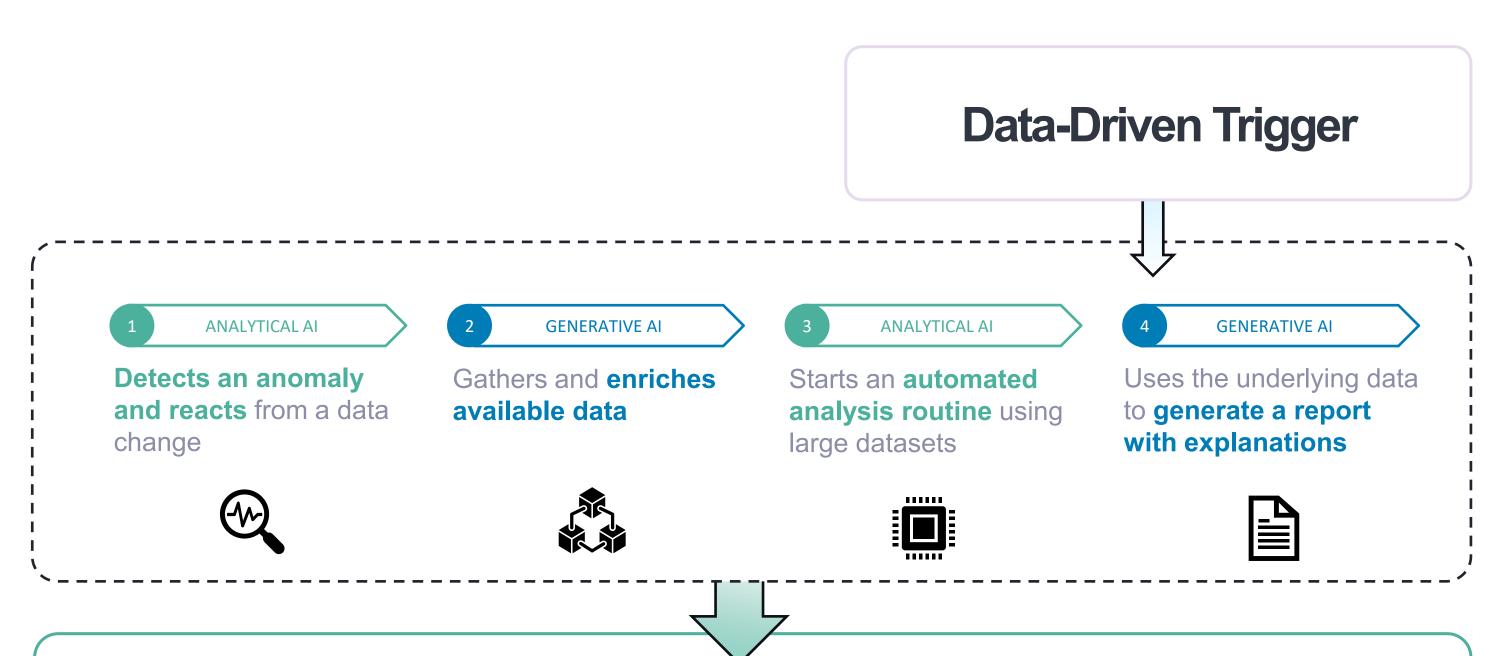

Investing Use Case 1: Solve Specific Tasks

Solution

Implementing & Scaling The Technology

The Al Scalability Journey:

Al Use Cases In Asset & Wealth Management

Al Use Cases In Asset & Wealth Management

Support The Investment Team

EXAMPLES:

- > Strategic and Tactical Asset Allocation
- > Investment Commitee's Unbiased Input
- > Quantitative Input Within Client's Model Construction
- > Signals For Portfolio Managers

Rebalance Portfolios
At Scale

EXAMPLES:

- > Ability to manage thousands of portfolios at a time
- > Used for fund management, ETFs, Segregated Accounts, Personalized Mandates, etc
- > PMs choose objectives & constraints, then the AI does the heavy lifting

Commentaries & Reporting

EXAMPLES:

- > Individual portfolio commentaries
- > Reporting done at scale
- > Model Portfolio delivery
- > Wealth Management Clients' Commentaries

Al Support To The Investment Team

Leverage organized big data to support the investment team

Type of Output:

- Support To The Strategic and Tactical Asset Allocation
- > Investment Commitee's Unbiased Input
- > Quantitative Input Within Client's Model Construction
- > Signals For Portfolio Managers
- > Expected Risk Scenarios

CLIENT EXAMPLE: EU Asset Manager With 80Bn+ AuM

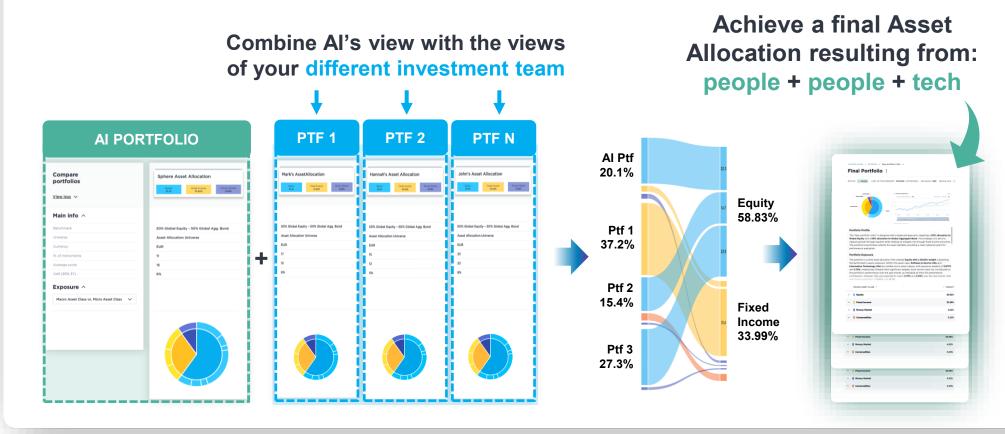

READ THE DATA:

The Investment Team leverages Al's information to complement their Asset Allocation activity

ACT ON THE DATA:

The Investment Team can create new Asset Allocation Scenarios

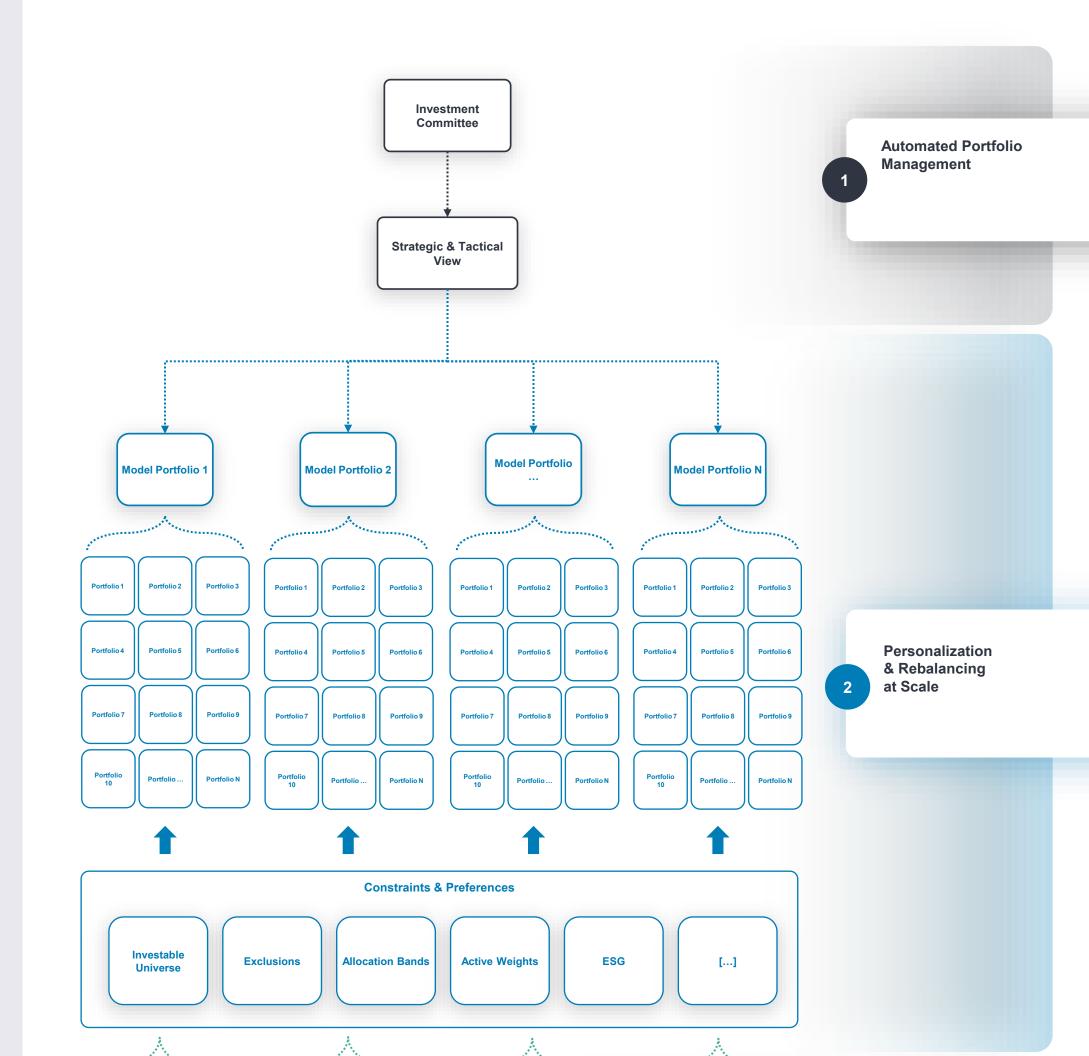

2

Rebalance Portfolios At Scale

Centralize investment ideas & scale delivery

Type of Output:

- > Ability to manage thousands of portfolios at a time
- Model delivery
- > Scaling up client personalization
